The Every Kid Needs a Domain Foundation

Address from the CEO & Founder on the occasion of the establishment of  (in his own hand)

Our Strategic Vision is :

Connecting every Kid in the Multiverse

It's time to recognise that ideas like Moore's Law and Cloud Computing (from my grandpa's time) have run out of steam and rather than inspiring us, they hold us back.

eKNAD is laying down the foundations for a connected future and will be the key provider of:

- IPV10 (or IPDec stage one)

- Teleportation (for lunch)

- The Quantum Action Toolset (primary school version)

- Managed Entropic Environments

I'm a bit tired now and am going to have a bit of a snooze.
